

ConSTARlation

ConSTARlation is designed to be a game where you reminisce over Space Shooter, but in a way with a twist. This is where the “Mysteries of Space” comes in. I always found constellations mysterious and some people really dig into them, so I figured why not make a game.

The game is borne out of my thought of who first connected the stars. That is my mystery and that is ConSTARlation.

I chose the Sagittarius sign because that is what my sign is. Also, I chose it because Archers are cool.
